KEY INSIGHTS & LEARNING

Profit: 13 trades Loss: 6 trades

- SMC Order Blocks provided highly accurate sell signals during the May-June downtrend phase across banking & IT stocks.
- CRT-TBS session-based setups worked exceptionally well on reversal stocks like Axis Bank, confirming bullish momentum.
- Banking sector (HDFC, SBI, Axis) contributed the most trades and had a 75% combined win rate in this analysis period.
- Maintaining a minimum 1:2 Risk-Reward ratio was key — even with 68% accuracy, the overall portfolio remained profitable.
- Trend alignment was critical: trades taken with the dominant trend had significantly higher accuracy than counter-trend trades.

CONCLUSION

This technical analysis project on Nifty 50's top 20 stocks demonstrated that combining Smart Money Concepts (SMC) with CRT-TBS time-based setups delivers consistent, high-accuracy trade signals. With a 68% win rate across 19 trades and a best R:R of 1:5, this project validates the importance of trend alignment, disciplined risk management, and institutional order flow analysis in building a robust trading framework.
